

QBF™ Series Filtration

A True Advance In Filtration Technology and Efficiency

Quad Barrier Filtration Products

These unique floating devices deliver lower initial and operating costs and zero normal maintenance costs. Global Splash's patented **Quad Barrier™** filtration technology provides filtration to 10µm while using 40% less energy than traditional filtration methods.

	Quad Barrier™ Filtration	Traditional 10µm Filtration
Investment per thousand gallons	\$3.00	\$5.00
Operational energy costs/ day	\$6.89	\$16.73
Est. yearly maintenance	\$160.00	\$650.00

Features & Benefits:

- **Self-cleaning; no external water source required for back flush cycles**
- **No chemicals used in filtration process**
- **Floats in source water, minimal land footprint**
- **Rejected materials and invasive species stay in source water**
- **Intake velocity <0.5 fps meets or exceeds new EPA requirements**
- **Use for emergency / maintenance Intake substitution. Supplements non-compliant intakes to achieve compliance.**
- **Modular configurations up to 5M gals/ day each module**
